Avoiding Corrosive gas, which contains alkaline or acid gas in the	יייפח

Avoid Metal components of the screen, the shell of power suppl	y

® 强力巨彩 IANG LI	Electro-static Protection	The worker must wear an anti-electrostatic wrist strap and anti- electrostatic glove. Various tools must be strictly grounded during assembly
	Screen waterproof	After installation of Led display screen, waterproof glue should be used on the connection part of cabinet and around the screen, making sure strict waterproof protection measures be implemented.
B 强力巨彩 IANG LI	Hazard of statement of the Magnetic installation Method	It's not recommended customers install modules outdoor with magnetic installation method. It will cause the following hazards,  1) Rain and snow could enter from the screen front side to the screen back side, it may cause the electronic components, system card, power supply and cables be corroded and lose efficacy.  2) The magnetic installation method cannot guarantee the
のperati	Product batch control	flatness and the performance of the led screen.  3) Module is likely to deform under extremely cold weather.  Different batches of products cannot be installed in the same screen, otherwise there will be color blocks (mosaic) on the display.
onal precauti ons	Product wiring	The module cannot be directly connected to 220V, and the module's positive and negative poles connection must be right.
超力巨彩 IANG LI	Disassembly and transportation	Do not throw, push, squeeze or press the module, avoid damaging the display screen.
B ANG I ANG I ANG I	Installation torque control	In connection with power supply, it is necessary to ensure tightening of terminal joint screw to prevent joint position from loosening, resulting in wire burning or product damage caused by high contact resistance. Torque of M4 screw is 6.0-8.0 Kgf.cm, and that of M3 screw is 4.0-6.0 Kgf.cm.
	Display control	Please do not display static picture or text, for this may cause LED lamp brightness go down seriously or LED lamp die. Please play moving pictures or text.
	Prohibition of live work	It is forbidden to assemble the module under the condition of power on, the module should be assembled on the wall when the main power input is disconnected.
	Environmental inspection	Temperature and humidity meters should be equipped on the installation site to monitor the surrounding environment of the screen in time. After heavy rain, it is necessary to check whether there are any problems such as dampness, water droplets and over humidity in the screen in time.

ANGLI	Avoid construction work near the installed LED screen	It is strictly forbidden to rebuild after to LED display screen, so as to prevent from being affected by the impact of such as welding, electric saw and oth	the LED display screen high current and dust, ner equipment.
